

# The importance of a pediatric palliative care diffusion campaign before the implantation of a new pediatric palliative care unit in a Spanish tertiary public hospital

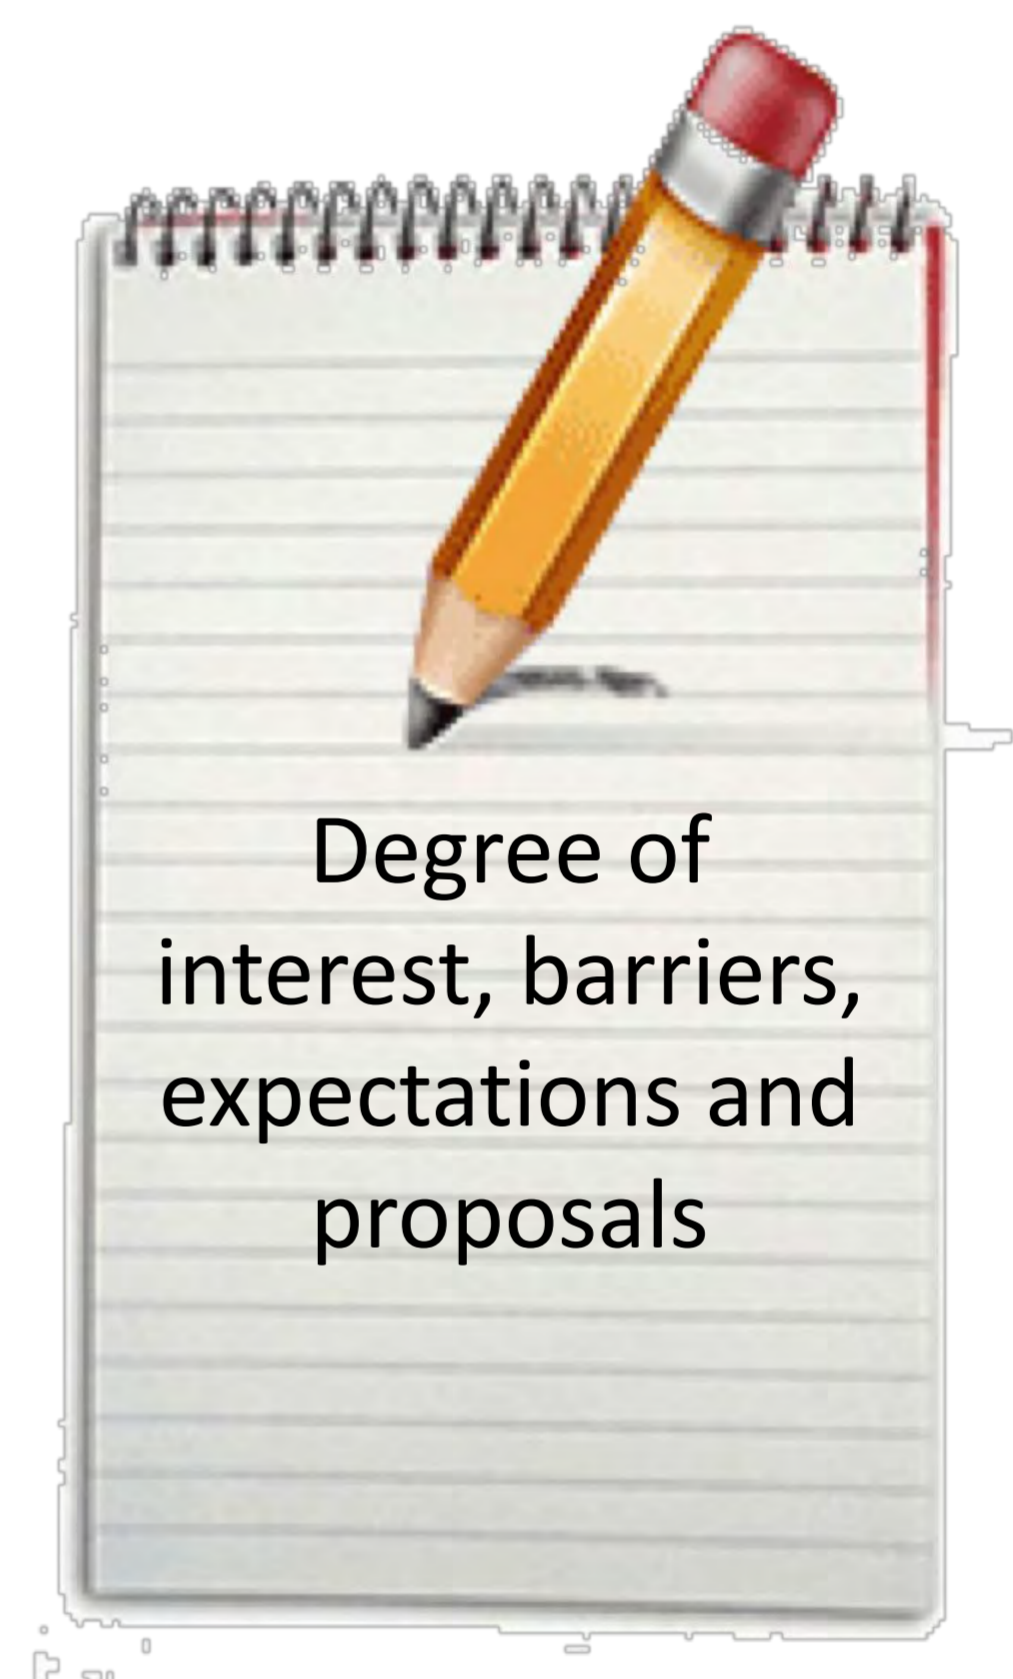

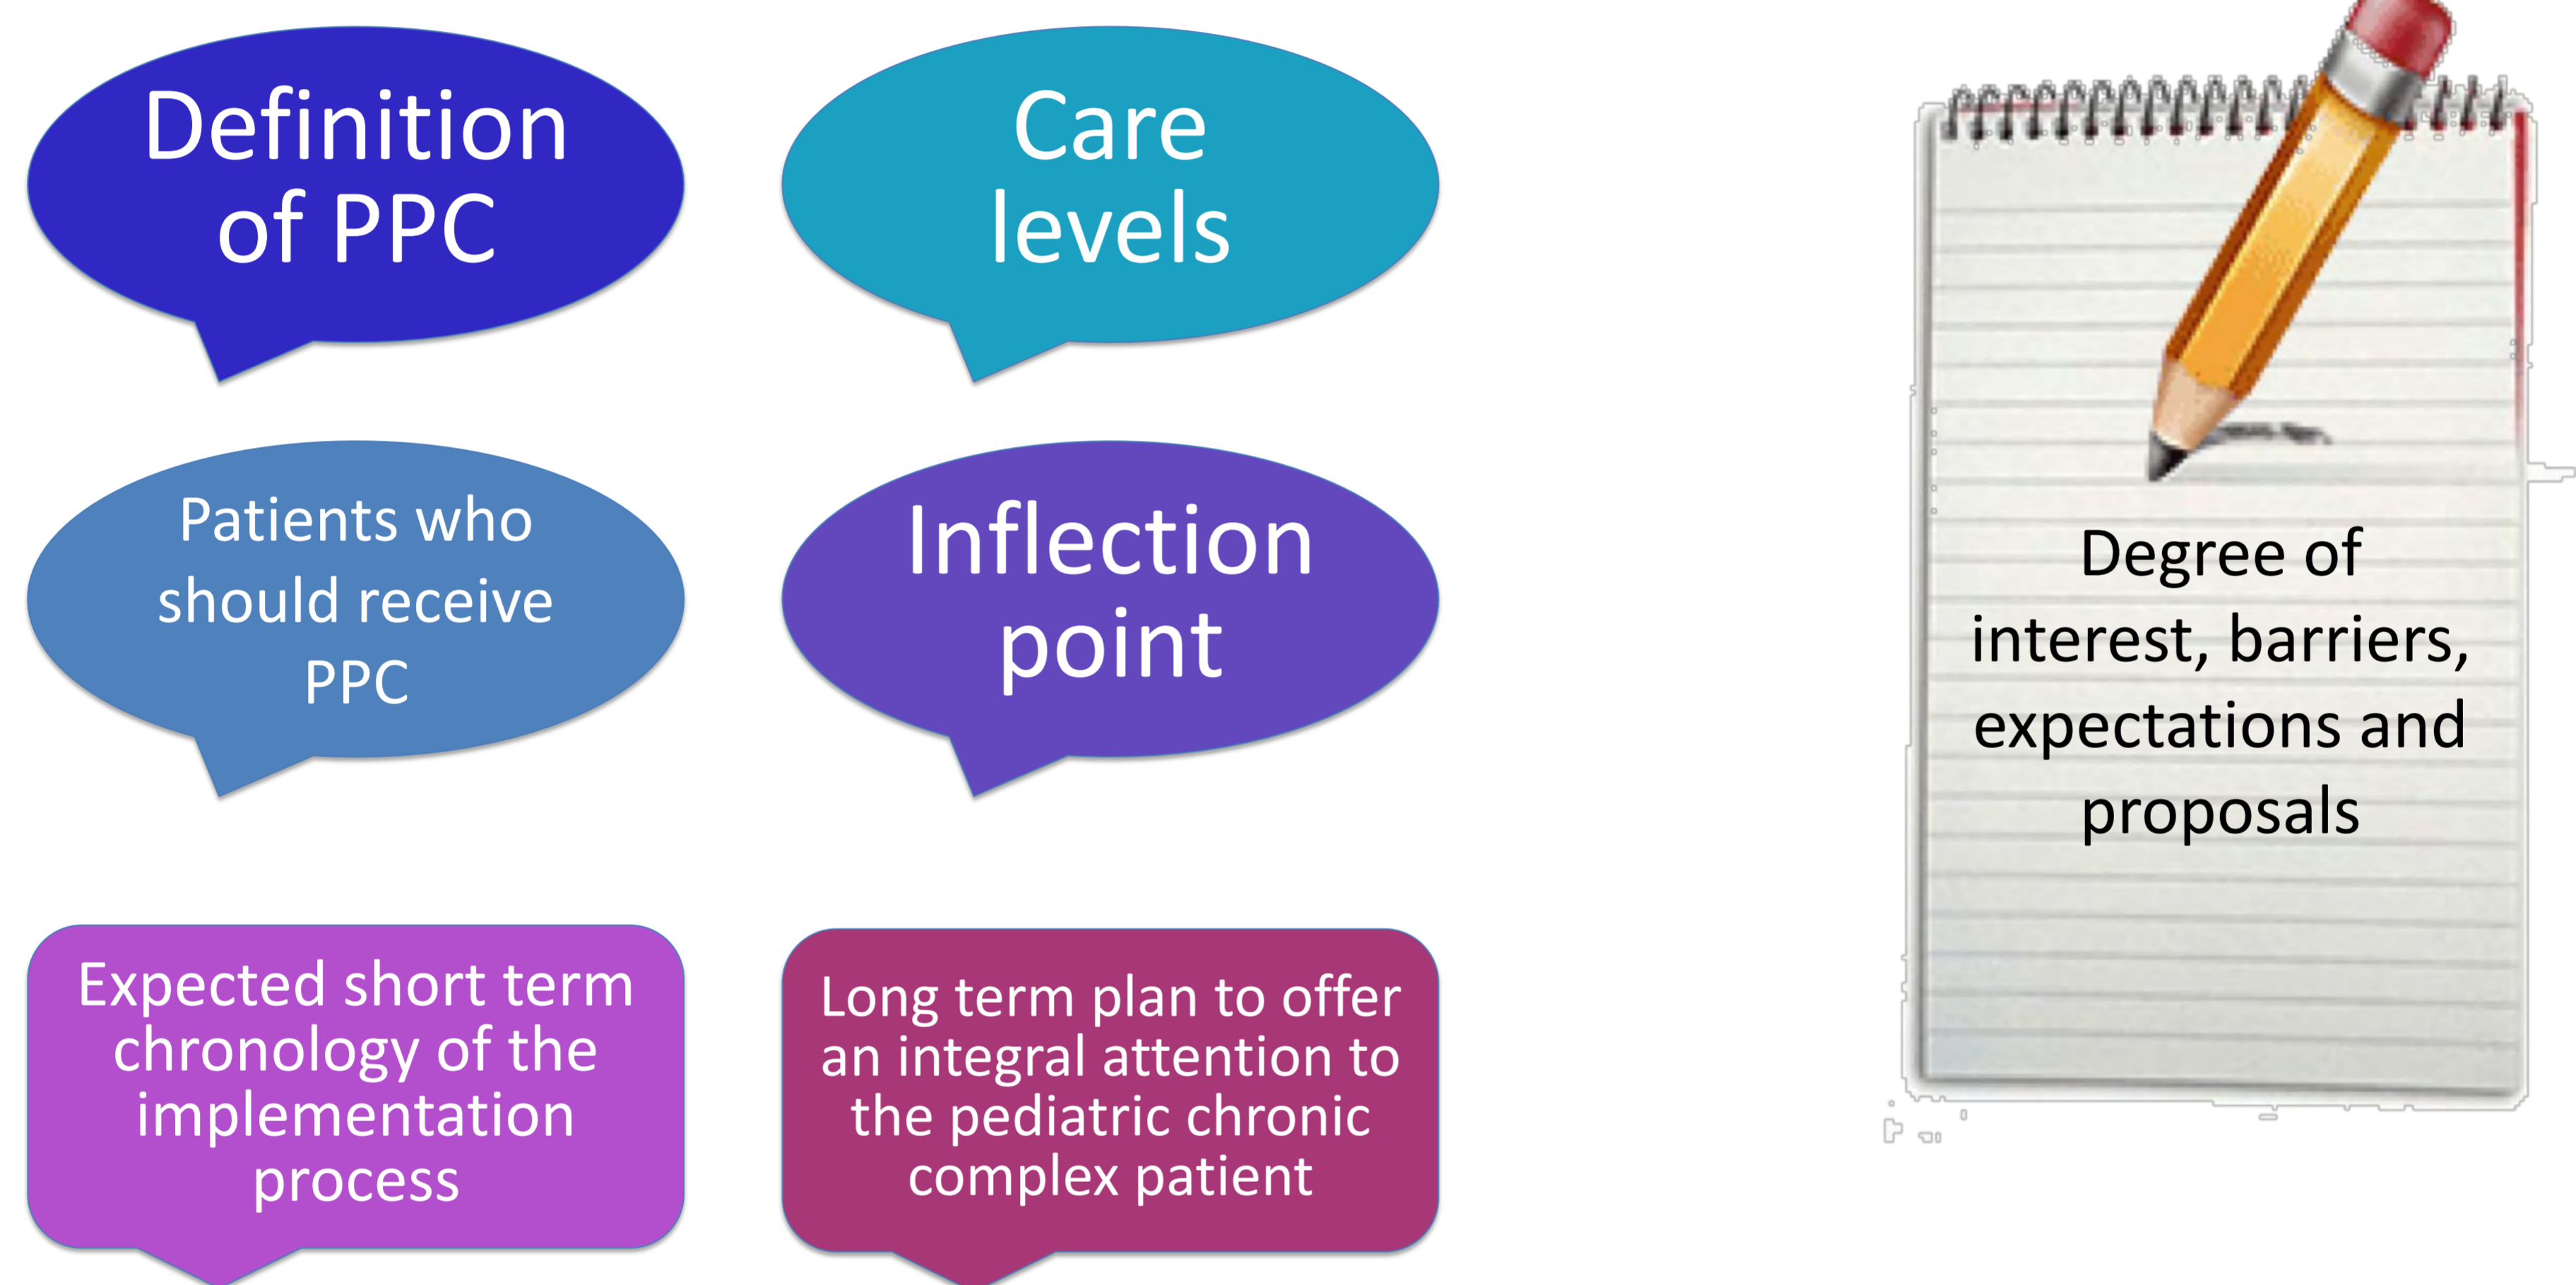

Andrés Morgenstern Isaak. Carla Cusó Cuquerella  
Hospital Universitari Vall d'Hebrón

## Aim

To implement a diffusion campaign about pediatric palliative care (PPC) to pediatricians and nurses of a tertiary Spanish hospital before implanting a new pediatric palliative care unit (PPCU)

## Approach taken

During the first month since the beginning of the project an informative session was held in each of the hospital pediatric services

## Results

- ✓ High interest in 9/11 services
- ✓ Lack of most responsible physician in chronic-complex patients
- ✓ Transition to adulthood
- ✓ Case deliberation
- ✓ End-of-life home care

## Conclusions
